KELMSCOTT
BLAST & PAINT

Capability Statement

WA OWNED & OPERATED

WORKING WITH DIFFERENT INDUSTRIES ACROSS THE STATE

Since 2014, Kelmscott Blast & Paint has built a strong reputation across Perth for quality workmanship, technical expertise, and reliable delivery on complex industrial and infrastructure projects. The Blast & Paint division provides certified abrasive blasting, industrial painting, and powder coating to extend the service life of steel, aluminium, and galvanised surfaces, delivered either on-site or within a controlled facility with full QA oversight. Servicing mining, agriculture, automotive, and construction sectors, the family-owned business prioritises fast turnaround, guaranteed workmanship, and premium coating systems.

WE WORK WITH

- **Fabricators & Engineering Firms**
- **Civil & Commercial Construction Contractors**
- **Industrial Facility Managers & Owners**
- **Utilities & Infrastructure Operators**

KELMSCOTT BLAST & PAINT

AS/NZS compliant processes and certified supervision | **End-to-end service delivery from surface prep to finish** | **Full traceability and QA documentation**

WHAT WE DO

Abrasive Blasting

- Surface preparation in accordance with AS 1627.4 standards
- Removal of rust, coatings, and surface contaminants
- Controlled blasting profiles tailored to coating system requirements

Paint Coating

- Application of specialist protective coatings through High Pressure Airless Pumps and Conventional Spray methods.
  - High build epoxies
  - Polyurethanes
  - Catalysed acrylics
  - Inorganic zincs
  - Epoxy zincs
  - Zinc phosphate (single and two pack)
  - Polysiloxanes

Powder Coating

- For unmatched quality, we rely exclusively on materials from industry leaders: Dulux Australia, Interpon (Akzo Nobel), Jotun Australia, and OxyTech.
  - Full blast, then either wet prime or E-Prime (an epoxy based powder prime)

WHY CHOOSE US

Quality Assurance & Supervision

- Supervised/Signed by NACE Level 2 certified coating inspector
- Inspection services: Surface Profile test, Soluble Salt test, Dust test, DFT, Holiday test, Adhesion test and regular ambient conditions monitoring
- Full QA documentation and traceability available for projects
- Capable to work according to Rio Tinto (SSP118) and BHP specification requirements

Workshop and Site Based Services

- Based on a secure 5,000+ sqm site, including a 300 sqm, 6 m-high, workshop and a 650 sqm blasting and spray facility capable of handling oversized equipment
- We have an 8T truck to transport jobs
- Easy access in and out
- Lifting capacity of upto 15 tonne
- Mobile site capabilities for field coating and touch-ups
- Spacious storage facilities enabling efficient and timely pickups
